COLLECTION

BOTANICA™ COLLECTION

BOTANICA COLLECTION

Practicality Meets Lifestyle

The Botanica Collection is a premium series of decorative pots and planters designed for an array of styles.

Designed with our customers in mind, we are always exploring the latest trends, while also incorporating classic shapes and designs. Our planters are made of durable plastic, which makes them much easier to move around and change up your style from season to season.

The Botanica Collection planters are great for container herb gardens, combination planters, and house plants. Of course flowers, plants, and herbs can be planted directly in the planters or a “drop in” container works too! All of our containers have pre-drilled drainage holes.

We hope you find the perfect planters to personalize and decorate your home, patio, or deck, while also bringing practicality to fit your lifestyle.
