

## FREIGHT

SCENARIO		YOUR OPTIONS
Scenario 1	Shipments for 24 plus pallets	Qualify for LPC paying freight; Full truck load = 24 pallets. The shipments must be for the same promise date and location. Will contain estimated shared freight charges at time of quote.
Scenario 2	Shipments for 12 plus pallets, but less than 24 pallets	Will qualify for shared freight. Will contain estimated shared freight charges at time of quote. The shipments must be for the same promise date and location. Actual shared freight at time of shipment will be charged.
Scenario 3	Shipments for less than 12 pallets	Will contain estimated freight charges at time of quote and actual freight will be charged at time of shipment.
Scenario 4	Pick-up credit allowance	Arrangements must be made to pick-up the orders at least 48 hours in advance of the promise date. A freight credit will apply. Completed orders not picked up after 72 hours will be shipped and actual freight charges will be applied.

## FAQs

### HOW CAN I AVOID FREIGHT CHARGES?

Shipments which equal 24 pallets will not occur freight charges as long as they have the same promise date (or can have the same promise date) and ship to one location.

### HOW WILL I KNOW WHAT THE FREIGHT CHARGES WILL BE FOR MY ORDER?

Your requested quote will contain estimated freight charges associated with that order. Final freight costs will be determined at time of shipment.

### WHAT IS SHARED FREIGHT?

LPC and the customer will share the freight charges.

### ORDERS VERSUS SHIPMENTS?

Where we do our best to produce orders with the same due date, orders with multiple line items create a production challenge.
