

VALUE-ADDED PROGRAMS

REV 5/2022

PRINT/COLOR/LABELING

We continue to adapt our production capabilities to meet consumer preferences for products with value-added content, such as color trends and trusted branded plant programs; in addition to large retail requirements for insightful care tags and labels.

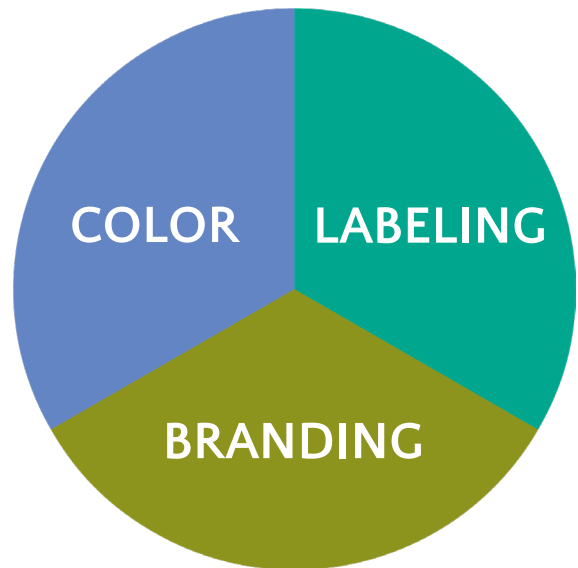

In anticipation of increased demand, we recently upgraded our printing capabilities with higher tech and increased throughput equipment.

These recent upgrades produce the best quality product at higher levels of output and thus we are adjusting our print, color and label minimums.

MINIMUMS	AMOUNT
Color	6 Bulk Boxes or 3 Pallets
Branding/Printing	6 Bulk Boxes or 3 Pallets
Labeling	2 Bulk Boxes or 1 Pallet

FEATURES

- Up to 8 color print capabilities.
- Ink color matching in tandem with pot color for optimal print quality.
- Pantone color matching for specialty programs.
- UV inhibitors for minimal sunlight fading.
- Coex production to reduce light transparency for stronger root growth.

FAQs

DO THE ABOVE QUANTITY REQUIREMENTS APPLY TO NATIONAL RETAIL BRANDS WITH GENERIC UPC'S?

If you want to ensure on time delivery it is best to order to the 6 Bulk Box/3 Pallet minimums.

WHEN PLACING MY ORDERS SHOULD I PROVIDE PO'S AS THEY BECOME AVAILABLE OR SHOULD I GROUP LIKE ITEMS TOGETHER?

It is best to provide all PO's for the same program or item all at once, we can then best schedule the production and possibly save you money on freight if the total order amount reaches the required truck-load.
